WriteUp for ProductDetails:

1. First, we have created a servlet based web application that shows a form to display product details.
2. Secondly, we created two jsp files in a single file as a form to enter the name details of the product as well.
3. Then, implement the codes and hence the form shows to give the product name, size, rate.
4. Finally, run the server to get the output on the screen and noted for future reference.
